# Kanban Pull Systems Kaizen
# Product Data Sheet

Date:_____

Sheet _____ of _____

Product Name: _____
Product ID Number: _____
Family/Comm. Group: _____

Storage Location(s): _____
Current Replenishment Method: _____
A-B-C-D Designation: _____
Number of Customers: _____

*Product Inventory Data*

Storage Qty.: _____
Container Qty.: _____
Storage Method(s): _____

Current Inventory :
Qty.: _____
DOS: _____

12 Month Inventory Profile: (Provide a graphical distribution)

Planned Safety Stock:
Qty.: _____
DOS: _____

Current Min./Max. Controls (As applicable)
Min. _____
Max. _____

*Consumtion Data*

**12 Month Historical**

Monthly consumption distribution: (Provide this distribution)
Is consumption cyclical? Y N
If yes, describe nature? _____

Order Qty. Distribution: (Provide this distribution)
Average: _____
Range: _____

Order Frequency: _____
Average: _____

"Drop-In" Sensitive? Y N
Frequency _____
Qty. per Occurrence _____

**Future**

Existing Firm Order Data: (Provide this information)
Existing Forecast Order Data: (Provide this information)
Factors Likely to Significantly Alter next 12 Mo. Demand:
Obsolesce? Y N
Other: List: _____

**Current Daily Demand Determination:** _____

*Supplier Data*

Supplier Name (Internal or External)

Total # of P/N's Produced by this supplier

List along w/ A-B-C-D Designator (Provide this data.)

Current Process Cycle-time

Typical Lot Size(s) and Range

Changeover Time

- Average (Typical)
- Range

Current Run Frequency

- Average (Typical)
- Range

Current Lead Time (day's)

- Average (Typical)
- Range

Shortage History (12 Mo.)

- # of Occurrences
- Qty. Per Occurrence
- Date of Each Occurrence
- Reason for each Occurrence

Quality Defect Rate

Current Capacity:

- # of shifts/hrs. available
- # of shifts/hrs. operational

Key Equipment Data

- Current Reliability
  - MTBF
  - MTTR
  - OEE
- Constraint?
